<b>A Chinese company is seeking European partners to work together for electronic shelf label (ESL) technology development under a technical cooperation agreement</b>	Tech. Request	<p>The <b>Chinese company</b> was founded in 1989. Their main products include commercial cash registers, commercial software, smart retail equipment, sports lottery terminals and so on. Now, based on the Chinese market demand, the company is engaged in <b>the electronic shelf label (ESL)</b> system technology development. They are looking for potential <b>European partners</b> with advanced ESL technology to conduct joint technical development via a technical cooperation agreement.</p> <p>Type of partner sought: The Chinese company is looking for European partners with <b>advanced ESL technology</b>. The expected cooperation method could be worked out via a <b>technical cooperation agreement</b>. The Chinese company hopes to launch the new ESL product to the Chinese market through joint technical development with potential European partners.</p>	<p><a href="#">Clicca qui</a></p> <p>Sei interessato al profilo? 		<p>applications. Especially for applications where jetting with high temperatures of <b>up to 130 degrees</b> and/or a 100% accuracy is a necessity. Companies that are already producing jettable materials which can be used to add functionality to existing or new products, for example by <b>jetting materials</b> in or onto these products, are invited to response. Also system integrators that <b>build machines</b> for these types of applications are welcome to join.</p>	
<p><b>A Polish construction company seeks technological partner to develop usage of an ecological cellulose fiber gypsum boards</b></p>	<p>Tech. Request</p>	<p>A <b>Polish company</b> conducts advanced works on an innovative product - a <b>compact prefabricated residential module</b>. The company is looking for a <b>technological partner</b> to develop a <b>replacement</b> for plastic panels used in prefabrication. The company wish to use an ecological gypsum boards with cellulose fiber. The company seeks partners for technical cooperation agreement.</p> <p>Type of partner sought: the company is looking for a <b>partner</b> that has an experience in the design, technological process and production of an <b>ecological gypsum boards</b> in prefabrication, mainly for <b>testing and optimization</b> of the range of its usage via <b>technological cooperation agreement</b>.</p>	<p><a href="#">Clicca qui</a></p> <p>Sei interessato al profilo? 		material. <b>Technical cooperation agreement:</b> develop a new version of an existing product to meet market needs.	
<b>Multi-purpose solar power plant with increased efficiency</b>	Tech. Offer	<p>The <b>Czech inventor</b> offers a solution for a <b>multi-purpose solar power plant</b>. The offered solution operates on the basis of four independent systems, which – thanks to energy storage – are able to <b>generate electricity non-stop</b>. Main advantages are combination of <b>solar power plant</b> and seawater desalination, which lead to faster return on investment than conventional projects. The inventor is looking for partners in order to further develop an idea based on a financial or license agreement.</p> <p>Type of partner sought: <b>companies or investors</b> interested in <b>further development and construction of the prototype</b>. Role of partner sought: active involvement in the development of the original idea in order to find feasible industrial use and joint exploitation of results. Before concluding a <b>partnership agreement</b>, the partner sought shall sign a NDA document prior to the information obtained from the inventor. The inventor is looking for investors and partners under a financial cooperation agreement in order to build a prototype. In the case of a <b>license agreement</b> the subject of the license will be the sale of know-how, drawings and calculations, etc. The inventor is also ready to <b>discuss the sale of all his rights</b> regarding a multi-purpose solar power plant.</p>	<p><a href="#">Clicca qui</a></p> <p>Sei interessato al profilo? [Profile View](#)  
[MSCA-ITN-2020: French University is looking for companies from material analysis or cultural heritage field to join MSCA-ITN-2020 consortium and host a PhD student](#)

A **French University** is looking for **industrial partners** from the material analysis sector or the heritage field to join consortium on MSCA-ITN-2020 Call. This project seeks to set up the first **European multidisciplinary and innovative plaster network** around casts dating back to the Renaissance all the way to the 20th century. Partners would host a PhD student for 1-3 months and provide research training: all costs would be funded by the project.

Type of partner sought: The **French University** is now seeking **industrial partners** from the **material analysis sector** or the **heritage field** which can host a **PhD student** for 1-3 months in the following fields:

- Characterisation of the constituent plaster materials / origin of raw materials.
- Patina, polychromy on initial surfaces & alteration, cleaning and surface treatment
- Dating and authentication of artworks
- Data learning and management, and economic value. **The salary, accommodation and administration fees** will be funded by the **H2020** programme: partners will not have to pay out anything. Partners are expected to offer research training to the **PhD students** during the secondments. They can also participate to the **Gallery training** events in suggesting speakers, providing training on non-transferable skills (communication, intellectual property rights, etc), participating in job fairs and other project-related activities. The partners would join a **large network of academics, private organisations and museums** in 7 different countries.

Targeted countries in priority are Austria, Italy, Portugal, the Netherlands, Greece, Romania, Germany. But applications are also welcomed from other H2020 eligible countries.
